<b>Office Action Summary</b>	<b>Application No.</b> 10/773,652	<b>Applicant(s)</b> LOGOSZ, TONY	
	<b>Examiner</b> Timothy D. Collins	<b>Art Unit</b> 3643	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 06 October 2005.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**DETAILED ACTION**

***Election/Restrictions***

1. Claims 1-8 and 12-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 10/6/05.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 9 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by USPN 4708078, USPN 2486158, and USPN 5816537.

a. The above listed patents clearly disclose inflatable leading edges and ribs with interconnected parts.

4. Claims 9 and 10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by USPN 5244169 to Brown et al. (hereinafter called 169).

b. Re claims 9 and 10, 169 discloses interconnected leading edge and struts in figure 1 and 7, where the strut 32 is shown to be connected to the leading edge 30. Also it is shown in figure 7 that the strut and leading edge may be

Art Unit: 3643

connected via a regulator and tube 61 and 60 respectively. The regulator being the valve and seen in column2 at lines 59-65 at least.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over 169 as seen above in claims 9-10.

c. Re claim 11, 169 may not specifically disclose that the valve is a clamp, however clamps are a form of valve and a well known replacement for other forms of valves which connect fluid compartments. Therefore it would have been obvious to one of ordinary skill in the art to have applied the teachings of clamps into the device of 169 so as to allow for a cheaper and more reliable valve in the interconnection of the air storage bladders. This would reduce costs and raise reliability.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following show inflatable wings with sections and valves.
